Surviving the Climate Crisis

*"a massively entertaining compendium ...
also massively important"* - Bill McKibben

**THERE
IS NO
PLANET B**
A Handbook for the Make or Break Years

Mike Berners-Lee

The climate crisis is both the easiest and the hardest issue we have ever faced. The easiest because we know what we must do. We must stop the emissions of greenhouse gases. The hardest because our current economics are still totally dependent on burning fossil fuels, and thereby destroying ecosystems in order to create everlasting economic growth.

Greta Thunberg

Action ?

IPCC in Autumn 2019 said we need to stay well under 2°C global temperature increase. To do that we need to dramatically cut our carbon emissions, which mean stopping our burning of fossil fuels.

CORNWALL has to make an average reduction of CO₂e, of

13.4%

Every year from 2020
